Inside BLTS

It was time to give our workshop floor a re-paint, ready for new pallet trucks and fork-lifts and to upgrade the compressor. This has now set us up for the winter, ready for any repairs and refurbs required.

Did You Know?

Fork lift truck maintenance is a legal requirement. Regularly planning your maintenance can help to ensure that your fork lift is operating safely and efficiently. The easiest way to do this is to carry out daily checks. The UKMHA website has more information and detailed fact sheets on this and all other aspects of maintaining your truck, visit www.ukmha.org.uk to download your copies.

FYI...

We're members of the UKMHA (UK Material Handling Association). A not-for-profit organisation which represents all aspects of the UK's material handling industry.
